

1/2 HP Cast Iron Sewage Pump

Engineered to handle the tough demanding tasks for wastewater and effluent waste transfer. Ideal for use in residential, commercial, industrial, and agricultural applications with light to medium transfer demands such as dewatering, effluent waste, wastewater, and handling where such materials must be moved upward from a collection area to sewer lines, septic lines, or drainage areas

Durable Cast Iron Construction for years of Service and Reliability.

“Piggy-back” Tethered float switch for manual or automatic operation.

Non-clogging Vortex style impeller handles up to 2” solids

2” NPT threaded discharge with 10’ Power Cord

Performance

Discharge Head	0'	5'	10'	15'	MAX LIFT
Gallons / Hour	6500	5000	4200	2400	18'
